

OROVILLE DAM CITIZENS ADVISORY COMMISSION

Hosted by the California Natural Resources Agency

ROLL CALL

- Lieutenant Collins
- Supervisor Connelly
- Supervisor Conant
- Secretary Crowfoot
- Deputy Director Curry
- Supervisor Flores
- Supervisor Fuhrer
- Assemblyman Gallagher
- Supervisor Kimmelshue
- Deputy Licon
- Captain Million
- Director Nemeth
- Senator Nielsen
- Councilmember Pittman
- Mayor Reynolds
- Lieutenant Stokes
- Superintendent Teague
- Supervisor Vasquez
- Genoa Widener

ITEM 1: WELCOME AND INTRODUCTIONS

ITEM 2: ACTION ITEMS & ROADMAPS

Commission Action Items Tracker

	Item	Meeting	Status
1	Tour of Joint Operations Center (State-Federal Flood Operations Center in Sacramento)	Mtg 2 11/2019	On hold due to Covid-19. Aiming for Q2 2022.
2	Report out how instrumentation performed and was managed during winter operations	Mtg 2 11/2019	Ongoing.
3	Invite State Water Contractors to future meeting(s)	Mtg 2 11/2019	On track. Invite for Q3 2021 meeting.
4	Provide regular updates and milestones developments from DWR on Forecast-Informed Reservoir Operations (FIRO) as well as Oroville and New Bullards Bar water control manual processes	Mtg 3 02/2020	On track. Update planned for Q4 2021 meeting.
5	Follow-up on the status of the Federal Energy Regulatory Commission (FERC) relicensing	Mtg 3 02/2020	Ongoing. Anticipate early 2022 update.

Commission Action Items Tracker

	Item	Meeting	Status
6	Follow-up on the status of Federal Emergency Management Agency (FEMA) reimbursement for spillway reconstruction	Mtg 3 02/2020	Ongoing.
7	Discussion to help state agencies and local partners address homelessness concern around Feather River.	Mtg 3 02/2020	For future Commission consideration.
8	CalOES follow up with CalTrans on the status of their post-fire mitigation along County highways	Mtg 5 11/2020	Done. Work confirmed complete.
9	DWR updates on debris and storm inflows	Mtg 5 11/2020	DWR monitoring, will notify Commission as needed.
10	DWR follow-up re: Hyatt Power Plant	Mtg 5 11/2020	Done. Update provided at Q2 2021 meeting.

Commission Action Items Tracker

	Item	Meeting	Status
11	Offer new members, Kimmelshue, Fuhrer and Vasquez, a Commissioner orientation.	Mtg 6 2/19/21	On track.
12	Post additional contact information on OCAC website.	Mtg 6 2/19/21	Done. Contact e-mail and phone # are available on Commission website.
13	Agendize discussion on lessons learned from 1986 and 1987 water events.	Mtg 6 2/19/21	On track. Update planned for Q4 2021.

2021 Public Meeting Agenda Roadmap

Q3 (August 27, 2021) Infrastructure

Topics

Planned Major Projects at Oroville Facilities

- Asset Management
- Annual Maintenance Plan

Status Updates

Commission Report

Q4 (December 3, 2021) Operations

Topics

Oroville Dam Facility Operations

- Winter Operations Plan
- U.S. Army Corp of Engineers
(water control manual update)

Status Updates

Commission Report
Wildfire Season Update

2022 Public Meeting Agenda Roadmap

Q1 (2022) Partnerships

Topics

Dam Facility Partnerships

- FERC Relicensing
- Recreation Partnerships
- Public Safety Partnerships

Status Updates

Commission Report

Q2 (2022) Joint Operations Center – Sacramento

Topics

Joint Operations Center

- Tour of Joint Operations Center
(*Commissioner only portion*)
- Overview of Joint Ops and Flood Ops
- 2017 Lessons Learned and Current Procedures

Status Updates

Commission Report

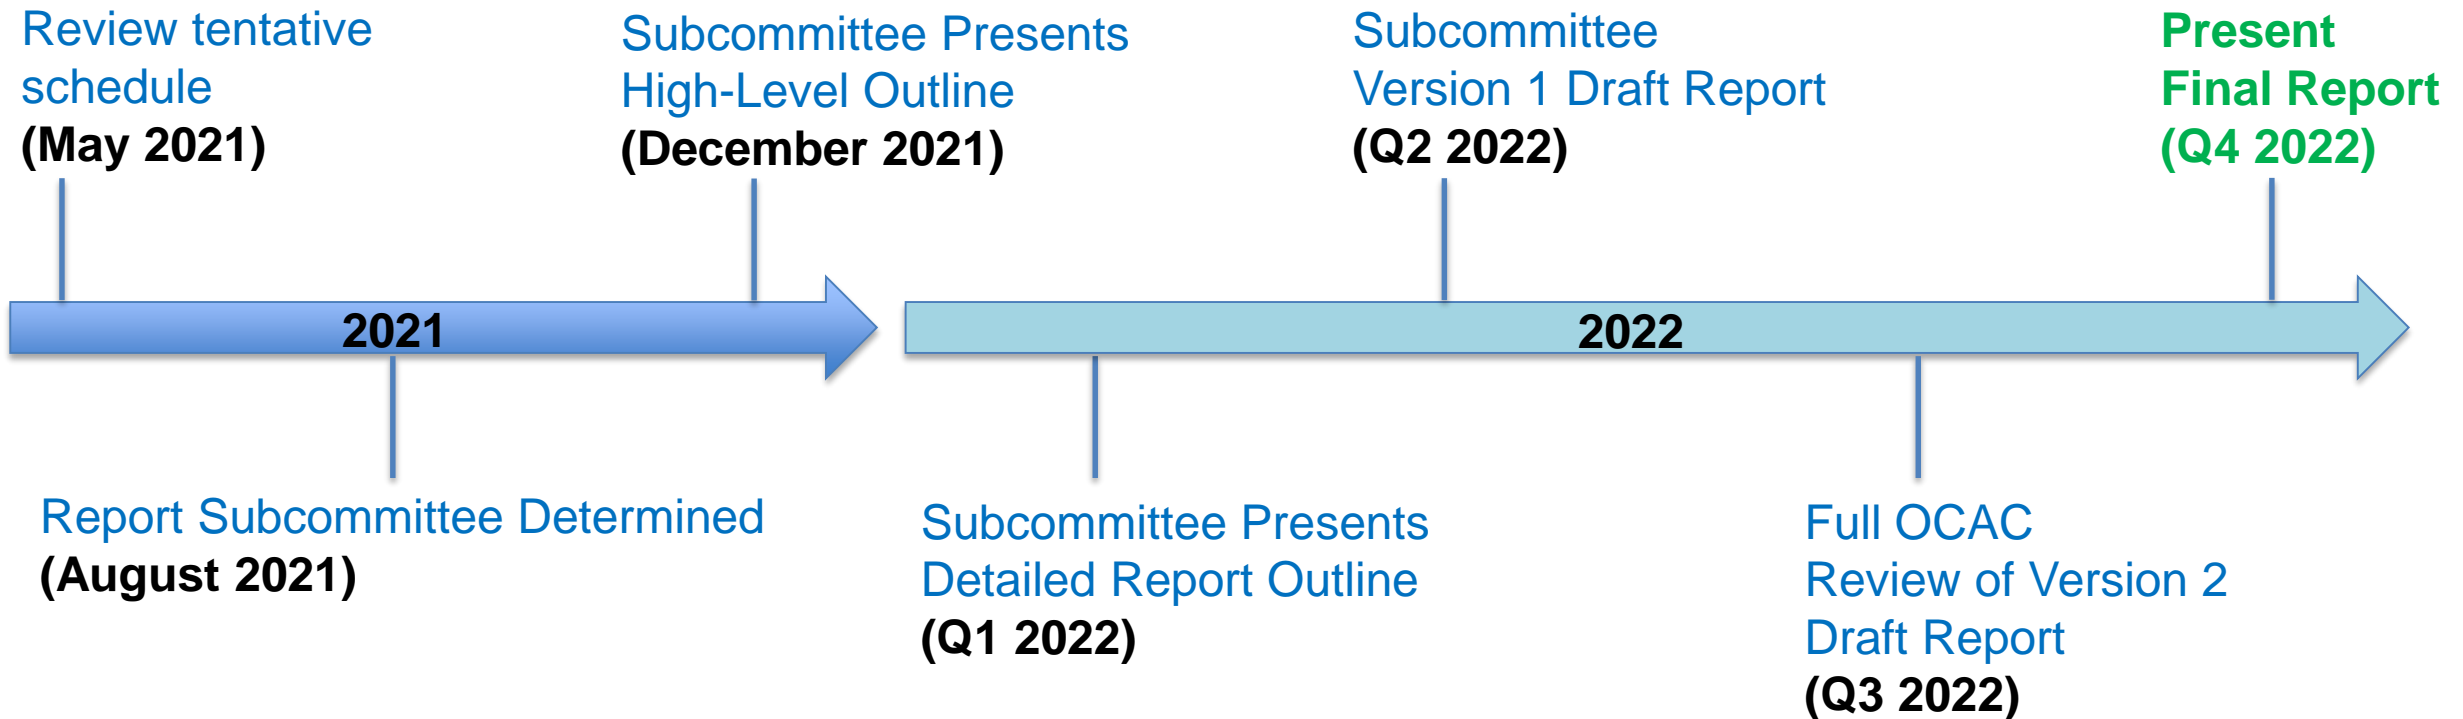

Commission Report

Senate Bill 955 Requirements

SB 955 states the Commission will publish a report at least **once every three years** that provides the following:

- An **overview of ongoing maintenance and improvements** made at the Dam and Dam complex;
- A **register of communications** received from State Agencies and other parties to the Commission;
- **Notice of upcoming plans** made by State Agencies for the Dam and Dam Complex; and
- An **overview of flood management projects on the Feather River** affecting public safety and flood risk reduction.

Commission Report Development Timeline

ITEM 3:
DAM SAFETY PROGRAM:
REGULATORY PERSPECTIVE

California's Dam Safety Program

CALIFORNIA DEPARTMENT OF WATER RESOURCES
DIVISION OF SAFETY OF DAMS

Sharon K. Tapia, P.E., PMP

May 28, 2021

Dam Safety Authorities

**California Water Code
Division 3. Dams and Reservoirs
Part 1. Supervision of Dams and Reservoirs**

**California Code of Regulations
Title 23. Waters
Division 2. Department of Water Resources
Chapter 1. Dams and Reservoirs**

Recent Dam Safety Initiatives & Legislation

Dam Safety Initiatives:

- Proposed Legislation for Emergency Action Plans
- Directed Expedited Reviews of Spillways

- Inspection Frequencies and Requirements
- Independent Review of DSOD's Dam Safety Protocols

Feb 24, 2017

Governor's 4-Point Plan to Bolster Dam Safety and Flood Protection

Jun 27, 2017

Senate Bill 92

- Hazard Potential Classification Update
- Inundation Maps*
- Emergency Action Plans
- Bolstered Enforcement*
- Amended Annual Dam Fees*

Assembly Bill 1270

Feb 26, 2018

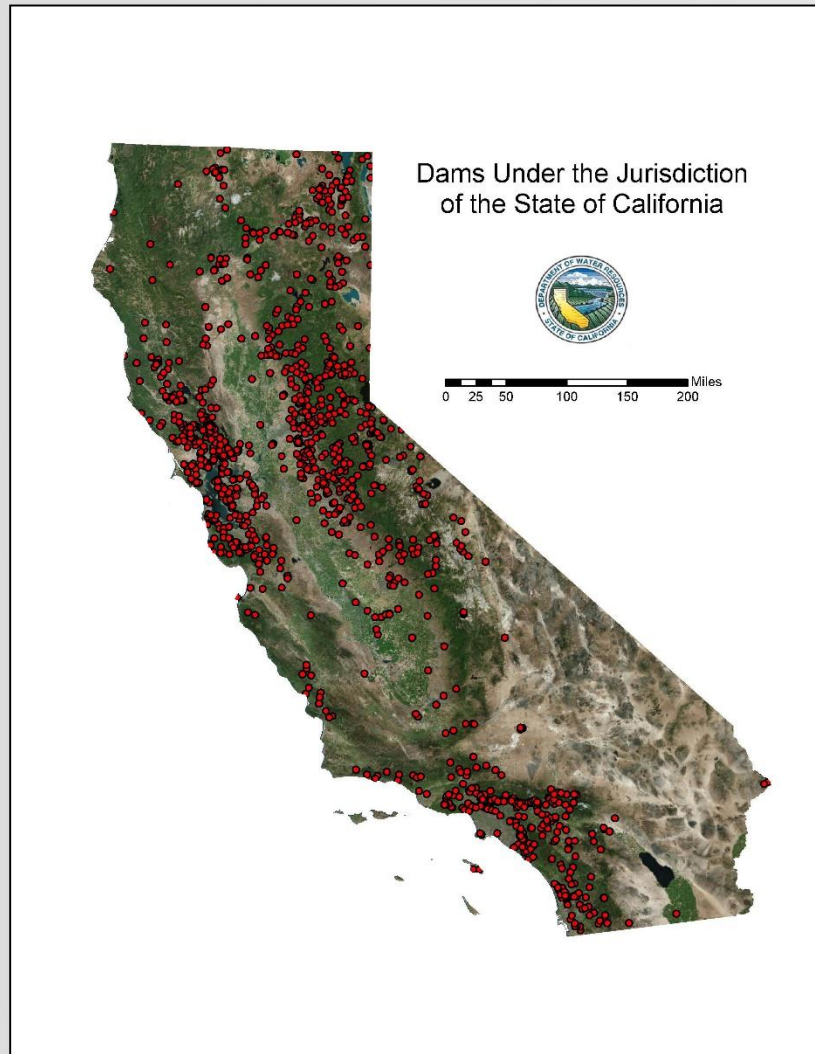

Assembly Bill 2516

Sep 19, 2018

ITEM 4:
DAM SAFETY PROGRAM:
PUBLIC SAFETY PERSPECTIVE

CALIFORNIA DEPARTMENT OF WATER RESOURCES

State Water Project Dam Safety Program

Castaic Dam - High Outlet Tower and Access Bridge, Los Angeles County

**Oroville Citizens Advisory Commission
May 28, 2021**

**Presented by:
David Sarkisian, PE, CEG
Chief of Dam Safety Services
SWP Chief Dam Safety Engineer**

26 State Water Project Dams

Field Division	Dam
Oroville	Oroville Dam
	Parish Camp Saddle Dam
	Bidwell Bar Canyon Saddle Dam
	Thermalito Diversion Dam
	Thermalito Forebay Dam
	Thermalito Afterbay Dam
	Feather River Fish Barrier Dam
	Antelope Dam
	Frenchman Dam
	Grizzly Valley Dam
Delta	Bethany Dams
	Clifton Court Forebay Dam
	Del Valle Dam
	Patterson Dam
	Dyer Dam
San Luis	O'Neill Forebay Dam
	Sisk Dam (San Luis Reservoir)
	Little Panoche Detention Dam
	Los Banos Dam
Southern	Pyramid Dam
	Quail Dam
	Castaic Dam
	Devils Canyon Second Afterbay
	Cedar Springs Dam
	Crafton Hills Dam
	Perris Dam

Focus for Typical Industry Dam Safety Program – Pre-2000

- Surveillance & Inspections
- Dam Safety Assessments
- Reservoir Operations
- Maintenance
- Design and Construction
- Emergency Action Plans
- Independent Reviews

B. F. Sisk Dam (San Luis Reservoir) Glory Hole Spillway and Gianelli Pumping-Generating Plant Intake Structure

2017-2018 SWP Dam Safety Program Reviews

- Independent Forensic Team Report
- Owner's Dam Safety Program Audit
- ISO 55000/ASDSO Peer Review
- Management Reviews/Visits with Peers
- Dam Safety Program Maturity Matrices

INDEPENDENT FORENSIC TEAM REPORT OROVILLE DAM SPILLWAY INCIDENT

JANUARY 5, 2018

Common Areas Identified for Improvement

- Update the SWP Dam Safety Policy
- Define the Top-down structure
- Increase training and interaction with dam safety organizations
- Implement Cross-Divisional Dam Safety Teams
- Link the SWP Dam Safety Program to the O&M Asset Management Program
- Improve Culture of Continuous Improvement

Road-mapping of Multi-year Dam Safety Program Initiatives

- 30 initiatives or “tasks” identified → Consolidated to 16 Initiatives

- Solidify Guiding Documents
- Functional Design Implementation
- Dam-Specific Asset Management Plans
- Risk Management
- Maintenance Management
- Data and Document Management
- Emergency Preparedness
- Core Competencies
- Outsourcing Strategy
- Business Processes
- Resource Requirements
- Training Program
- Industry Outreach
- Communication and Change Management
- Performance Metrics
- Program Reviews

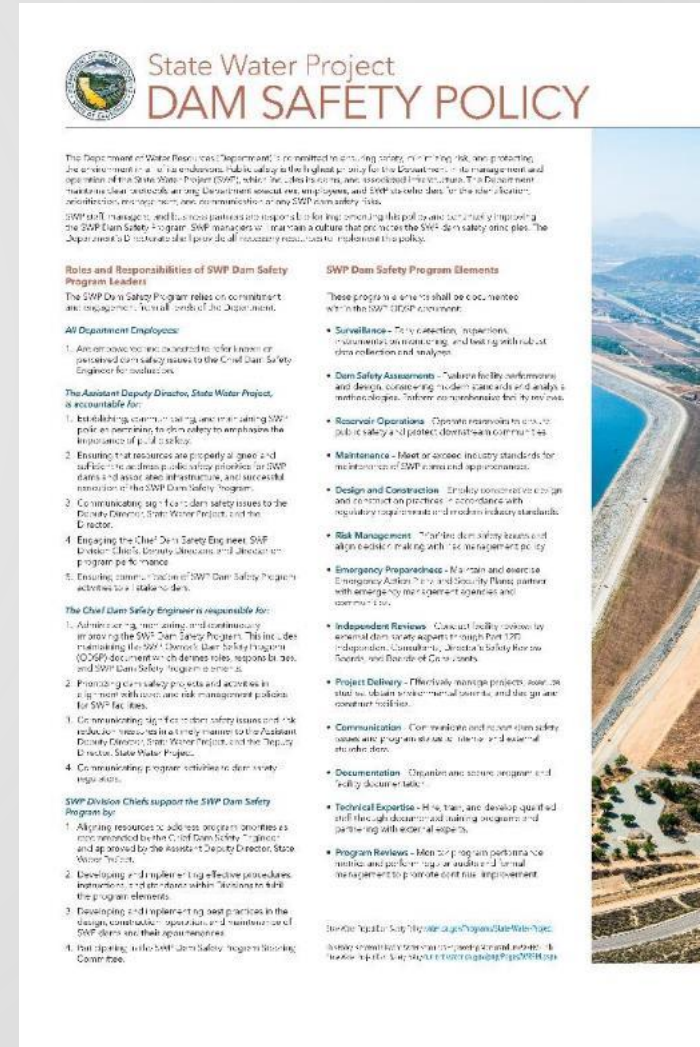

Initiative No. 1 – Solidify Guiding Documents, Including the SWP Dam Safety Program Document

- Updated Policy Signed by Director on November 2, 2018
- Public safety is the highest priority for the Department and the SWP
- Assigns responsibilities and accountability to key positions
- Formally Established Program Elements

CALIFORNIA DEPARTMENT OF
WATER RESOURCES

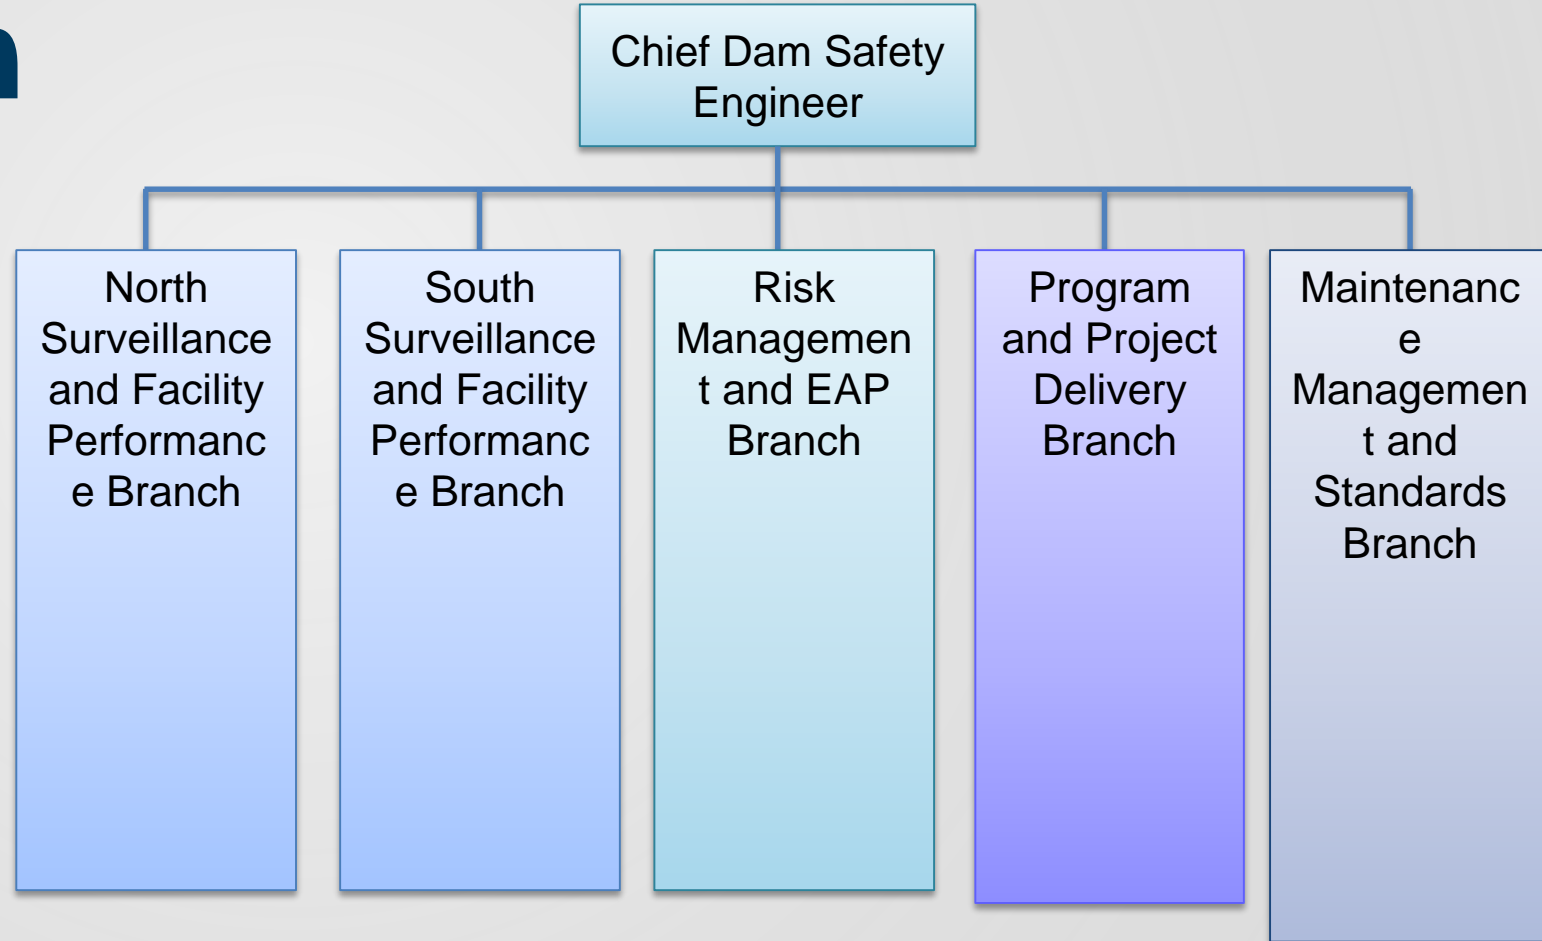

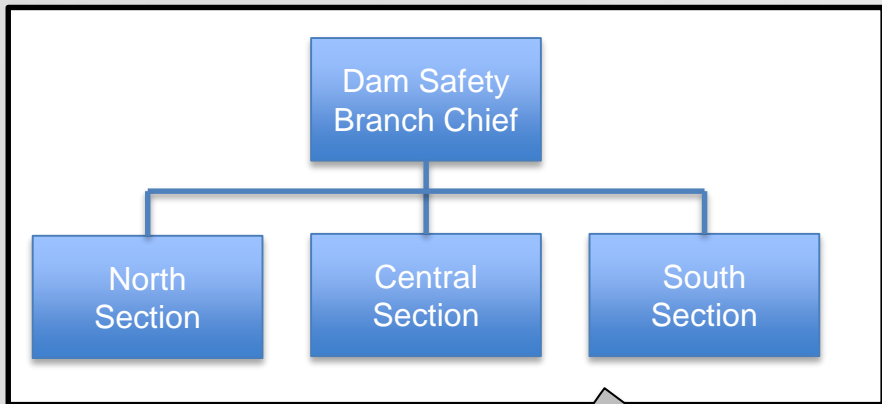

SWP Dam Safety Program Elements

- Surveillance
- Dam Safety Assessments
- Reservoir Operations
- Maintenance
- Design and Construction
- Risk Management
- Emergency Preparedness
- Independent Reviews
- Project Delivery
- Communication
- Documentation
- Technical Expertise
- Program Reviews

Initiative No. 2 – Complete SWP Dam Safety Program Functional Design Implementation

Initiative No. 4 – Enhance DWR’s Approach to Dam Safety-related Risk Management

- Level 2 Risk Analyses
- ✓ Oroville Dam
 - ✓ Pyramid Dam
 - ✓ Castaic Dam

DWR Division of Operations and Maintenance Risk Matrix									
Likelihood		DWR Division of Operations & Maintenance Risk Matrix							
Likely to occur 10 times a year	1x10 ⁰	7	7	14	21	28	35	42	49
Likely to occur within 1 year		6	6	12	18	24	30	36	42

Likely to occur within 10,000,000 years	< 1x10 ⁻⁶ to 1x10 ⁻⁷	2	2	4	6	8	10	12	14	16
Likely to occur less often than 10,000,000 years	< 1x10 ⁻⁷	1	1	2	3	4	5	6	7	8
Consequence Category		1	2	3	4	5	6	7	8	9
		No injury	Near miss	Minor injuries not requiring medical attention	Single injury requiring medical attention	Multiple injuries or permanent disability	Fatality	Multiple Fatalities 1 - 10	Multiple Fatalities 10 - 100	Multiple Fatalities 100 - 1,000
Public Safety		No damage to public or private property	Or minor property damage	Or moderate property damage	Or moderate property damage over large area	Or major property damage	Or major property damage over large area			

Initiative No. 7 – Enhance Emergency Preparedness

- [Dam Breach Inundation Map Web Publisher \(ca.gov\)](#)
- Emergency Action Plans (EAPs)
- Virtual Annual EAP Seminars
- Tabletop and Functional EAP Exercises
- Internal Rapid Response and Recovery Plans

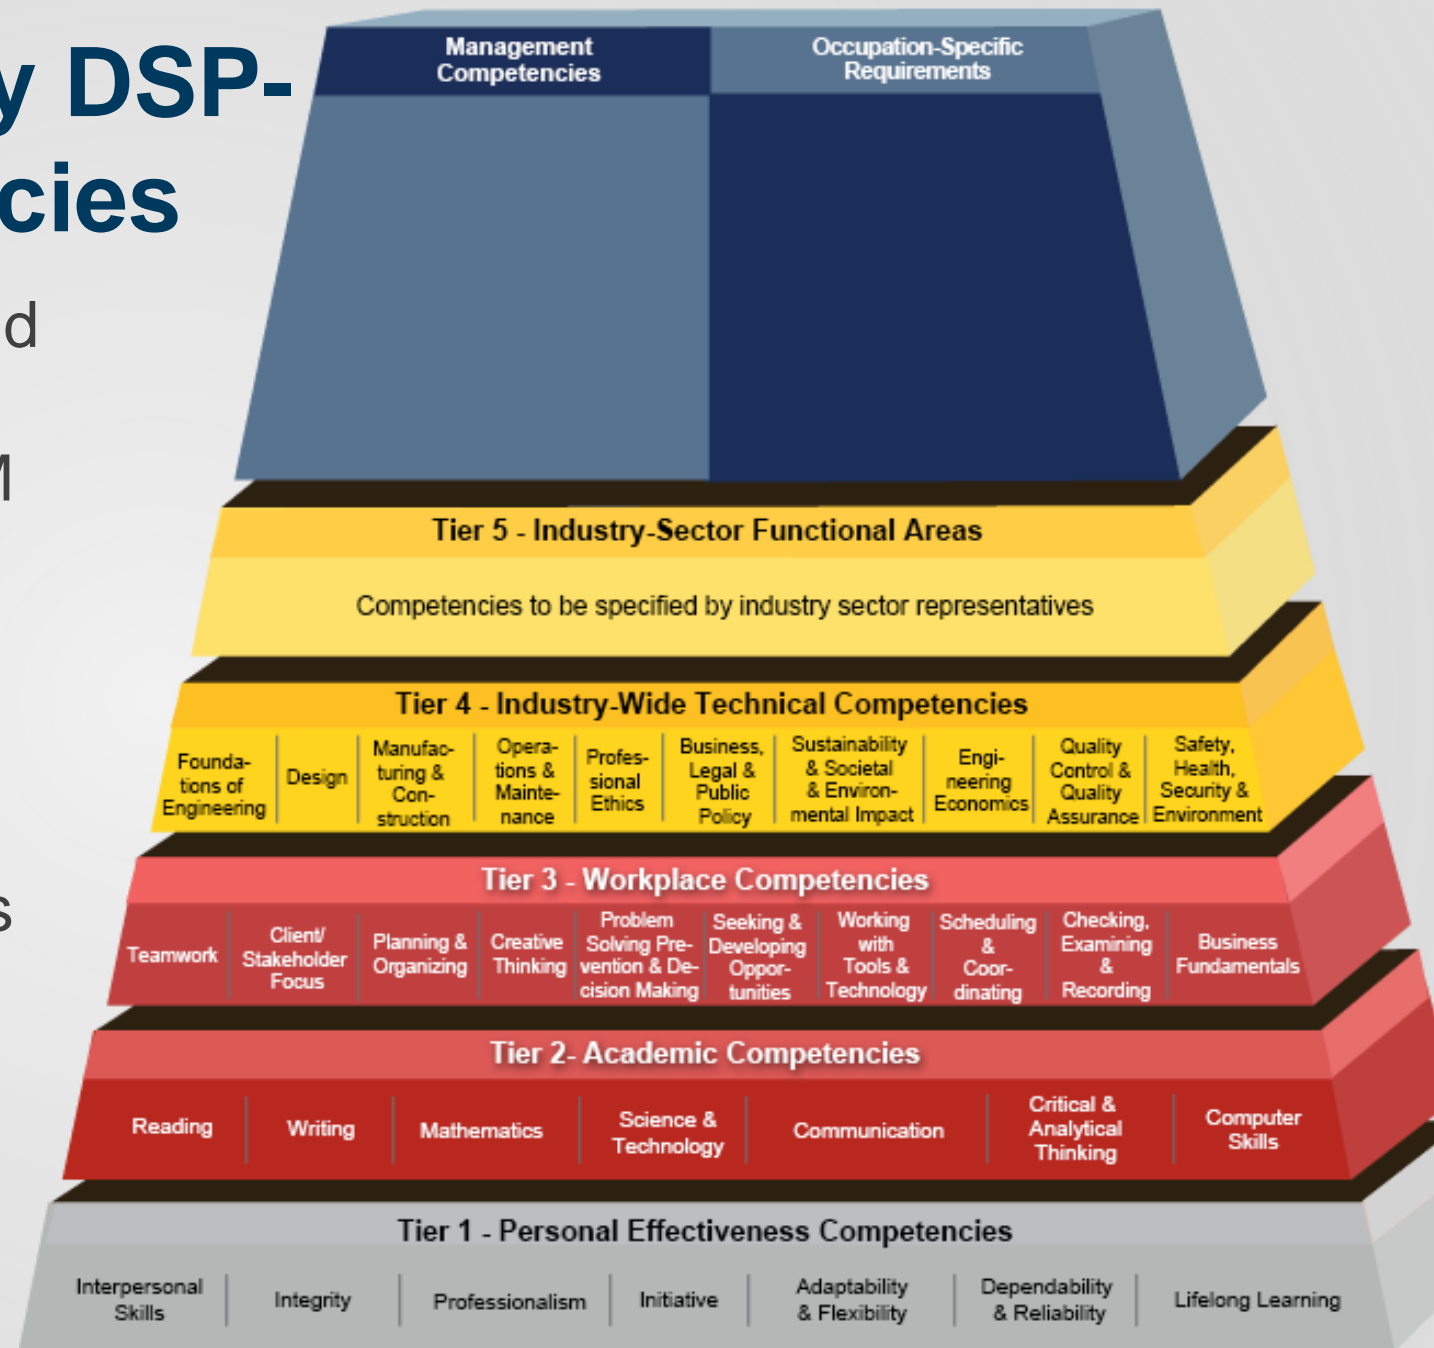

Fair Weather Failure Inundation Map for Bidwell Bar Canyon Saddle Dam, Butte County

CALIFORNIA DEPARTMENT OF
WATER RESOURCES

Initiative No. 8 – Identify DSP-related Core Competencies

- Identified the knowledge, skills, and abilities required for successful execution of job duties within O&M Dam Safety Services.
- Utilized the US Dept. of Labor Engineering Competency model
- Multiple Tiers of competencies
- Challenges of Tier 5 competencies

Initiative No. 12 – Formalize and Expand Dam Safety Program Training

- ✓ Established Training Plans to require development of **dam safety core competencies**
- ✓ Training Contracts
- ✓ Developed SWP Dam Safety Awareness Modules 1A and 1B
- ✓ Developing Field Division-specific Dam Safety Training Modules

Oroville Field Division Dam Characteristics, Potential Failure Modes and Visual Inspection Guidelines

CALIFORNIA DEPARTMENT OF WATER RESOURCES

Initiative No. 13 – Enhance Industry Outreach

- Increased collaboration with the U.S. Army Corps of Engineers and Bureau of Reclamation
- Increased dam safety conference and workshop attendance.
- Participation in CEATI – Dam Safety Interest Group.

Initiative No. 14 – Develop DSP Management of Change Program and Communication Plan

- Early Implementation Projects
- Future Dam Safety Projects
- Emergency Action Plan-related Activities
- Inspection & Surveillance Activities (multiple responsible parties)
- Maintenance Activities
- Operational Activities
- Seasonal Forecasting
- Dam Safety Program Enhancements

Initiative No. 16 – Develop More Formal Dam Safety Program Management Review

- Bi-weekly SWP Dam Safety Program Steering Committee Meetings
- Quarterly meetings with FERC and DSOD
- Independent Verification & Validation
- Annual Program Reporting
- 5-year Program Review/Audit

Thank you

CALIFORNIA DEPARTMENT OF
WATER RESOURCES

ITEM 5: RISK ASSESSMENT

Risk Management in Socio- Technical Systems

Comments from Oroville Dam CNA Process

*Dr. R. Storesund, PE., GE, Consulting Engineer, Storesund Consulting
American Society of Civil Engineers, Region 9 Governor – San Francisco Section
Executive Director, UC Berkeley's Center for Catastrophic Risk Management
President & CEO, NextGen Mapping, Inc. (Software Development)
President & CEO, Storesund Construction, Inc. (Class A, B, C-57)
President & Director, SafeR³ (Non-Profit)*

May 28, 2021

About Rune

- Dual Degree Program UC Santa Cruz/UC Berkeley
 - BA Anthropology (UC Santa Cruz)
 - BS Civil Engineering (UC Berkeley)
- Masters in Geotechnical Engineering (UC Berkeley)
- Doctorate in Civil Systems (UC Berkeley)
- Executive Director, UC Berkeley's Center for Catastrophic Risk Management
- Consulting Engineer, Storesund Consulting
- President & CEO, NextGen Mapping, Inc. (Software Development)
- President & CEO, Storesund Construction, Inc. (Class A, B, C-57)
- President & Director, SafeR³ (Non-Profit)

My Disaster Research

- 1986 NASA Challenger
- 2003 NASA Columbia
- 2005 Hurricane Katrina
- 2010 San Bruno PGE Explosion
- 2010 Deepwater Horizon
- 2014 Oso Landslide (WA State)
- 2015 Aliso Canyon Gas Leak
- 2017 Oroville Dam Spillway Failure
- 2017 US Navy Ship Collisions
- 2018 California Wildfires (Butte County)
- 2019 Brumadinho Landslide
- 2019 Boeing 737 MAX
- 2020 Michigan Dam Failures

Oroville Dam CNA Ad Hoc

- Served at the invitation of Senator Nielsen and Assemblyman Gallagher
- Risk Management Perspective
- Ad Hoc: July 2018 to December 2020
- May 10, 2021 Report with Reflections and Recommendations

Community “Safety” Following Comprehensive Study - Oroville Dam

<http://safer3.world/>

May 10, 2021

What I'd like to Talk About Today

- What is risk & crisis
- Socio-Technical Systems (people and organizations too!)
- Understanding utility of “uncertainty” as a management variable
- Setting performance expectations (“Expected” performance)
- Use of “Leading Indicators”
- Tracking skew between “Work as Imagined” and “Work as Done”
- Advanced Inquiry Methods (Dialectic, Multiple Realities, etc.)
- Focus on “Valid” and “Reliable” methods
- Avoiding E3 Errors (solving the wrong problem precisely)
- Triangulation approaches to overcome conflicting/mixed signals
- Safety Culture and Process Improvement Programs

What I Can Talk About in 20 Minutes

- What is risk & crisis
- Socio-Technical Systems (people and organizations too!)
- Understanding utility of “uncertainty” as a management variable
- Setting performance expectations (“Expected” performance)
- Use of “Leading Indicators”
- Tracking skew between “Work as Imagined” and “Work as Done”
- Advanced Inquiry Methods (Dialectic, Multiple Realities, etc.)
- Focus on “Valid” and “Reliable” methods
- Avoiding E3 Errors (solving the wrong problem precisely)
- Triangulation approaches to overcome conflicting/mixed signals
- Safety Culture and Process Improvement Programs

Safety

- Searching for “safety”
- DWR wants to ensure safety
- Community wants to feel safe

Risk Perception – Insurance

“Regarding dams and private insurance. My understanding, which I confirmed, is that private insurers are not insuring dams (other than surety bonds for construction) and that they don’t think its a viable business opportunity because the potential losses are so high (liability insurance) and the costs of repair / reconstruction are so high (property insurance). I think it would be very difficult to get them to insure dams. “

Former California Insurance Commissioner

Oroville CAC “Opportunities”

- CAC has baton from Ad Hoc
- Take a leadership role in Proactive Risk Reduction
- Dam is not going to ‘fail’ tomorrow....BUT
 - Current techniques are deficient
 - Takes decades to implement substantial improvements
 - Aging infrastructure with unknown service life
 - Climate Change
 - Two (2) evacuations in 50 years, statistics says it will happen again!
- Critical to start laying a resilient foundation today!

Recommendations (Mini Projects)

- Re-engage the IFT to review progress on ‘lessons to be learned’
- Formalize community impacts for discharges 150,000 cfs to 700,00 cfs
- Explicit definition of ‘safety’ (what does ‘safe’ mean?)
- Be financially accountable for “Performance” (Compensation Fund)
- Perform detailed assumption audits (all dam infrastructure)
- Scrutinize Asset Management (not just plans but performance)
 - What is it supposed to do?
 - What is it actually doing?
 - Where are the differences?
 - Use on both physical assets as well as methods/procedures
- Require Life-Cycle Management Today!
 - Target service life
 - Components
 - Assemblies
 - System (where are the ‘weak’ links?)
 - Target maintenance and intervals
 - Life-cycle based budgeting, then track within expectations or not?

Vagueness of “Failure”

Figure 10. Extended Version of DWR O&M Asset Management Risk Matrix Used in CNA Risk Evaluations

Likelihood Annual Probability		Comprehensive Needs Assessment – Extension of DWR Division of Operations & Maintenance Asset Management Risk Matrix										
		1	2	3	4	5	6	7	8	9	10	11
Likely to occur 10 times a year	10											
Likely to occur within 1 year	9											
Likely to occur within 3 years	8.5											
1/10 – 1/3	8											
1/30 – 1/10	7.5											
1/100 – 1/30	7											
1/1,000 – 1/100	6											
1/10,000 – 1/1,000	5											
1/100,000 – 1/10,000	4											
1/1,000,000 – 1/100,000	3											
1/10,000,000 – 1/1,000,000	2											
1/100,000,000 – 1/10,000,000	1											
Negligible < 1/100,000,000												
Consequence Category		Consequence Level										
		1	2	3	4	5	6	7	8	9	10	11
Public Safety (Including Personnel Safety)		No injury	Near miss, minor injuries	Minor injuries	Single injury	Multiple injuries, perm. disability	0 – 1 fatalities	1 -10 fatalities	10 – 100 fatalities	100 – 1,000 fatalities	1,000 – 10,000 fatalities	> 10,000 fatalities
Financial Impacts (Direct and Indirect)		< \$100k	\$100k - \$1M	\$1M - \$10M	\$10M-\$100M	\$100M - \$1B	\$1B - \$10B	\$10B - 100B	\$100B - \$250B	\$250B - \$500B	\$500B - \$1T	> \$1T

Tolerable Risk Guidelines for Dam Safety (Life Loss) from FERC and other Federal Agencies

Failure is Time-Dependent

Limited “Imagination” for Scenarios

Consequences of Failure (Cf)

		Less Uncertainty	More Uncertainty
Probability of Failure (Pf)	Less Uncertainty	Traditional Quantitative Risk Analysis "Probabilities" <i>Well-Structured</i> <i>Well-Defined</i> <i>Bounded</i>	Unfolding Events Active Flooding Hurricane Aftermath
	More Uncertainty	Anticipated Events "Earthquakes" "1,000 year storm" "Possibilities"	Unanticipated Unfolding Events CRISIS <i>Ill-Structured</i> <i>Un-Defined</i> <i>Un-Bounded</i>

THE STATE OF DAM SAFETY PROGRAMS IN THE UNITED STATES

PRESENTATION TO THE
OROVILLE CITIZENS
ADVISORY COMMISSION
MEETING, 28 MAY 2021

ERIC HALPIN, PE

HALPIN CONSULTANTS LLC

- **As a US Army Corps of Engineers Infrastructure Leader (1980-2019):**
 - Owner and Self Regulator of +3,000 Dam and Levee Systems & Safety Programs
 - Vice Chair of the National Levee Safety Program
 - Primary Interface with Accountability to the Administration, Congress, and the Government “Watch-Dogs”
 - US Government Lead for International Partnerships with Spain, Netherlands, Japan, and United Kingdom on Safety Programs
 - Registered Professional Engineer (1988)
- **As Private Consultant: (2018-present)**
 - The Same Thing for Clients in Industry

Pulpit Rock, Norway

(2,000 feet above the fiords of Norway)

MY RISKY BACKGROUND IN SAFETY PROGRAMS

01

WHAT
CONSTITUTES A
STATE-OF- THE ART
DAM SAFETY
PROGRAM?

02

HOW DO SUSTAIN
THE STATE-OF-THE-
ART PRACTICE?

03

WHAT TRENDS
SHOULD WE BE
AWARE OF?

DISCUSSION TOPICS

Good governance never depends upon laws, but upon the personal qualities of those who govern. The machinery of government is always subordinate to the will of those who administer that machinery. The most important element of government, therefore, is the method of choosing leaders.

— *Frank Herbert* —

AZ QUOTES

WHAT IS IN A STATE-OF-THE-ART DAM SAFETY PROGRAM?

The State of the Dam Safety Industry

TRADITIONAL DAM SAFETY PROGRAM FOCUS (1968-TODAY)

- Compliance with Design Standards as a Measure of Safety
- Inspection and Monitoring for Performance Concerns
- Safety Assured by Regulation?

Traditional View of Infrastructure Safety

This is what following standards only has resulted in...

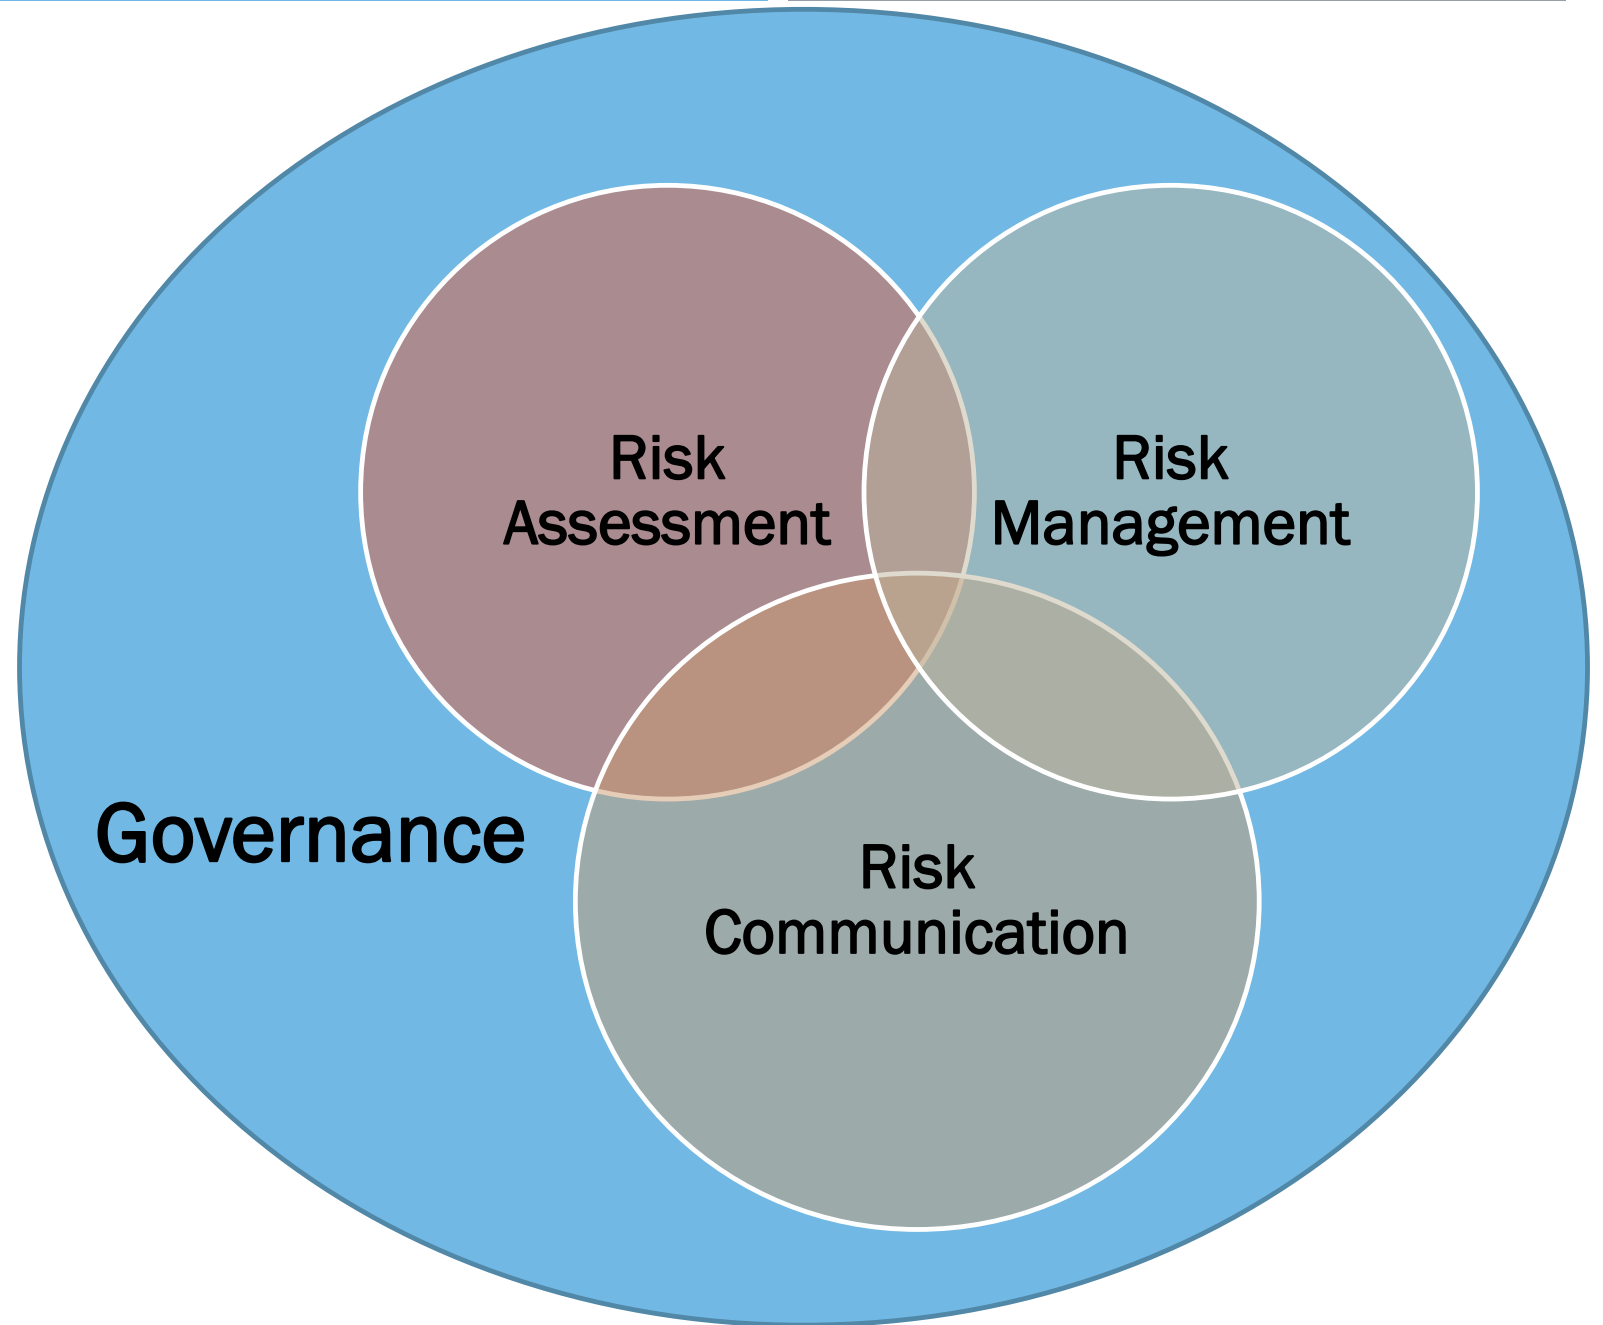

- Huge Variation in Risk
- Over and Under Investment in Risk Management
- Wrong Priorities
- Poor Understanding
- Dynamics!

One Size Doesn't Fit All!

MODERN DAM SAFETY PROGRAM FOCUS (SINCE 2000)

- Understand How Things Can Fail and the Risk Associated
- Risk Informed Decisions
- Sharing Responsibilities Via Improved Communication
- Governance: People, Process, & Policy

Why is a Strong Risk Framework Necessary?

Integration Via *is* Credibility:

- Dam Systems and the Environments they exist in are Complex and Dynamic
- Problems that You Can Understand are Problems That Can Be Solved
- Clear Relationships Within Governance: Policies, Processes, and People/Organizations

Built for the Long Haul

- Enduring Across Multiple Generations
- Adaptable to Evolving Practice, Science, Data, and Research

Risk Informed View of Infrastructure Safety

$$\text{Risk} = f(\text{Hazard}, \text{Performance}, \text{Consequences})$$

Modern Infrastructure Program: Focused on People, Performance, and Risks

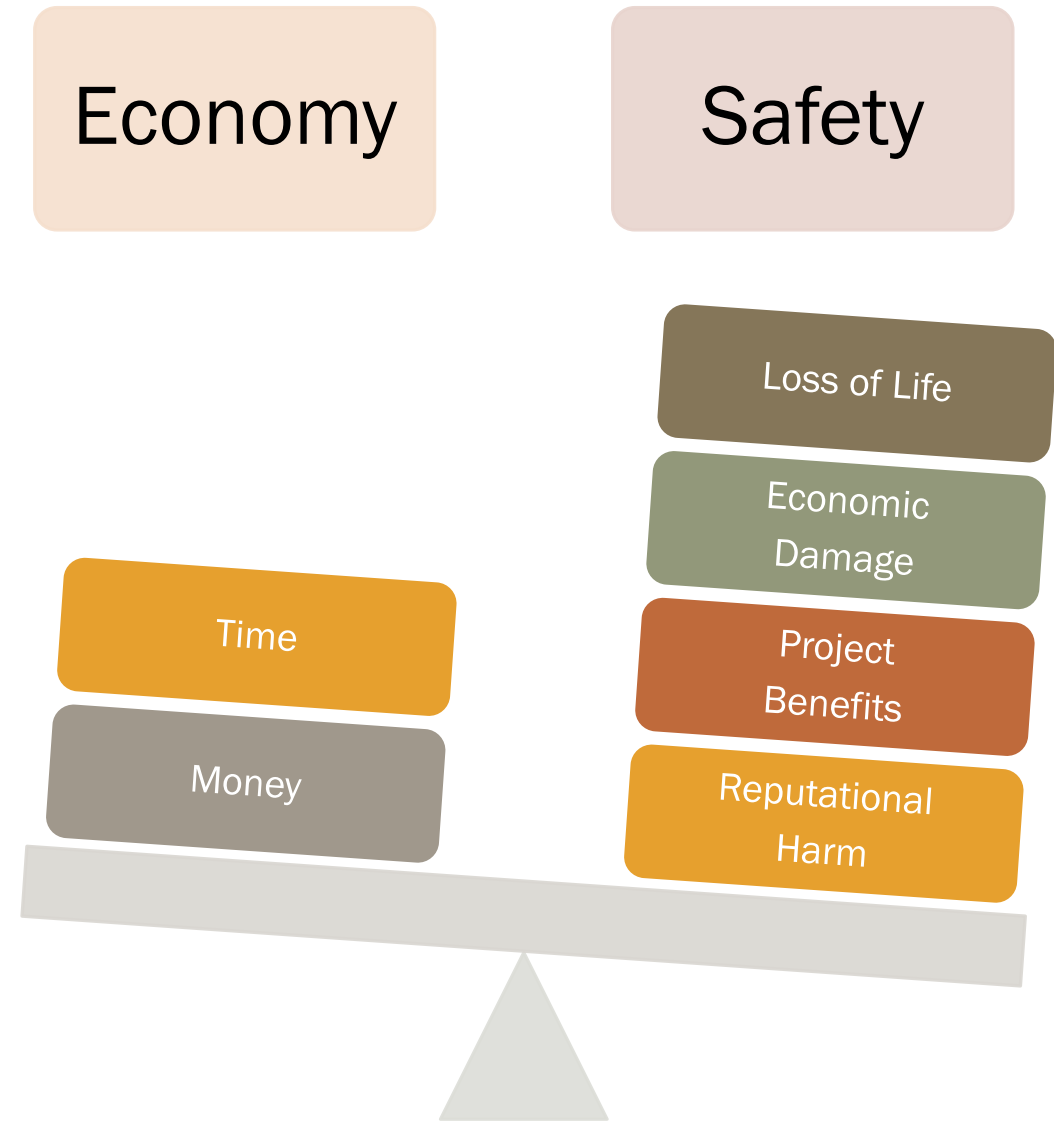

How Do We Sustain the State- of-the-Art Practice?

State of the Dam Safety Industry

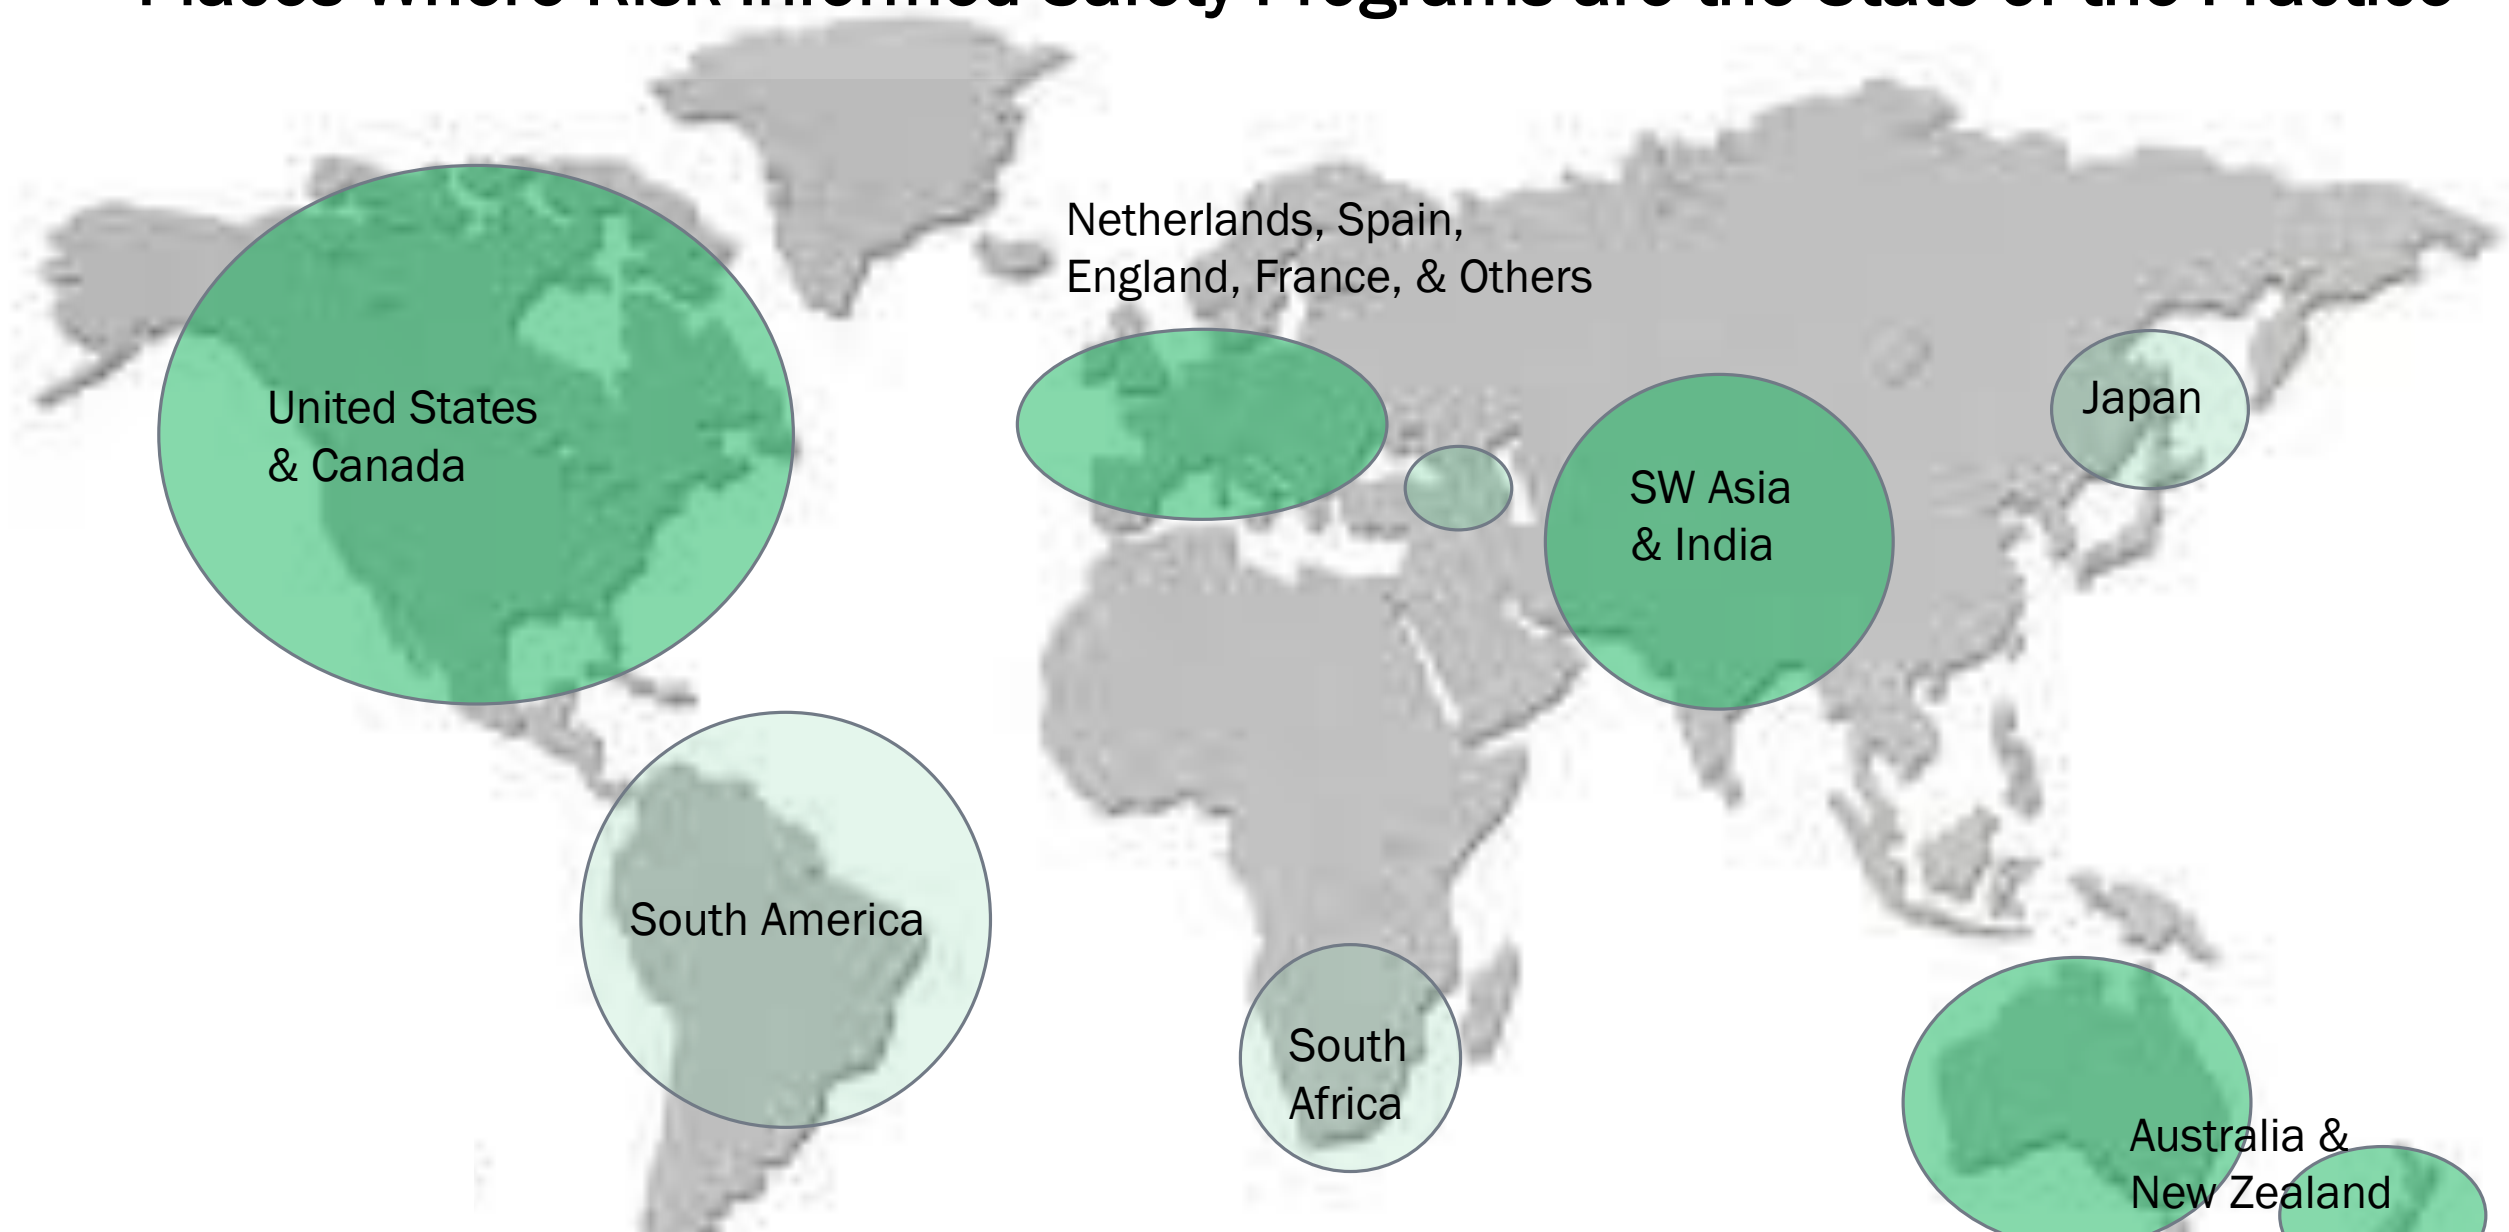

What Shapes Dam Safety Programs?

Safety Programs Constraints:

- Legislation and Regulations
- Technical Policies
- Funding
- *State of the Practice*

Places Where Risk Informed Safety Programs are the State of the Practice

What Industry Will Extract from the IFT Report

Change

- The “no fail” branch in some event trees can transition to failure in other failure modes*
- Large Damage States are Impactful and can transfer risk within a system*.

Sustain

- Independent Review and Challenge of Past Assessments is Necessary
 - Debate is Encouraged
 - Failure and Incident Rates are Extremely Low, But Industry Always Learns From Them
- Considerations of Systems and Human Factors Is Consistent with (and already a part of) Risk Informed Practice*

* Part of the Federal Risk Review Effort

Key Technical References for Modern Dam Safety Programs

- Guidance documents are the backbone to use of Risk in Dam Safety
- Scalable, but Consistent
- Adaptable, but Equitable
- Employed Broadly in National and International Programs

Assessment

Management & Communication

Human Systems

External System Influences

Political, Environmental, Economic & Social Factors

Governance and Human Factors

○ What Safety Programs Manage

Physical Systems

- Complex Interactions!
- Can Increase Risk and Uncertainty

How Risk Informed Safety Programs Address Human Factors

Reliability Analyses in Hydrologic Loading

Detection and Intervention Impacts in Fragilities

Remote Operations

Issuance of Warning

Evacuation Effectiveness

Gate Reliability Considerations:

- Remote Operations
- Site Access
- Crew Availability
- Gate Functionality
- Offsite Power Reliability
- Backup Power Reliability

Can Have 1-3 Orders of Magnitude in Effect on AEP of Design Loads (headwater)

Key Mitigating Measures for Human Factors

- Command and Control for Incident Decision Making
- Risk Informed Safety Programs
- Effective Communications and Public Awareness
- Collaboration with Key Stakeholders
- Training and Exercises
- Continuing and Periodic Evaluations
- Qualification Based Roles and Responsibilities

Engineering

Challenges for Our Industry

- Simplifying Assumptions about System Interactions and Human Factors are Necessary and Appropriate
- Don't Forsake the Governance Lessons that Have Served Us Well: Safety Programs
- Can We *Not* Afford to Implement Risk Concepts in Safety Programs?

"Most of the negatives in housing are probably behind us. The fourth quarter should be reasonably good, certainly better than the third quarter."

Alan Greenspan

Overconfidence Bias

“TRUST IS A RISK THAT MASQUERADES AS A PROMISE.”

ITEM 7: PUBLIC COMMENT

**The Oroville Dam Citizens Advisory
Commission will now take public comment.**

We appreciate your input.

ITEM 8: ADJOURN

Thank you all for joining us today, our next Oroville Dam Citizens Advisory Commission meeting will be on August 27, 2021.
